

The left side of the slide features a decorative design consisting of several vertical bars of varying shades of green and a cluster of five solid green circles of different sizes arranged in a vertical line.

AQUATIC PLANTS 5

Prof. Dr. Nilsun DEMİR

Aquatic macrophytes and relationships between Sediment

Potamogeton pectinatus

Ranunculus sphaerospermus

Potamogeton ponarmitanus and *Myrophyllum spicatum*

Macrophyte cover and the chemical properties of sediment

Effects of water movements on macrophytes

Depth

Relationships between aquatic plants and sediment and water movements

Model showing relationships
between aquatic plants and water
movement
