ARGOS HERA TAPINAĐI :

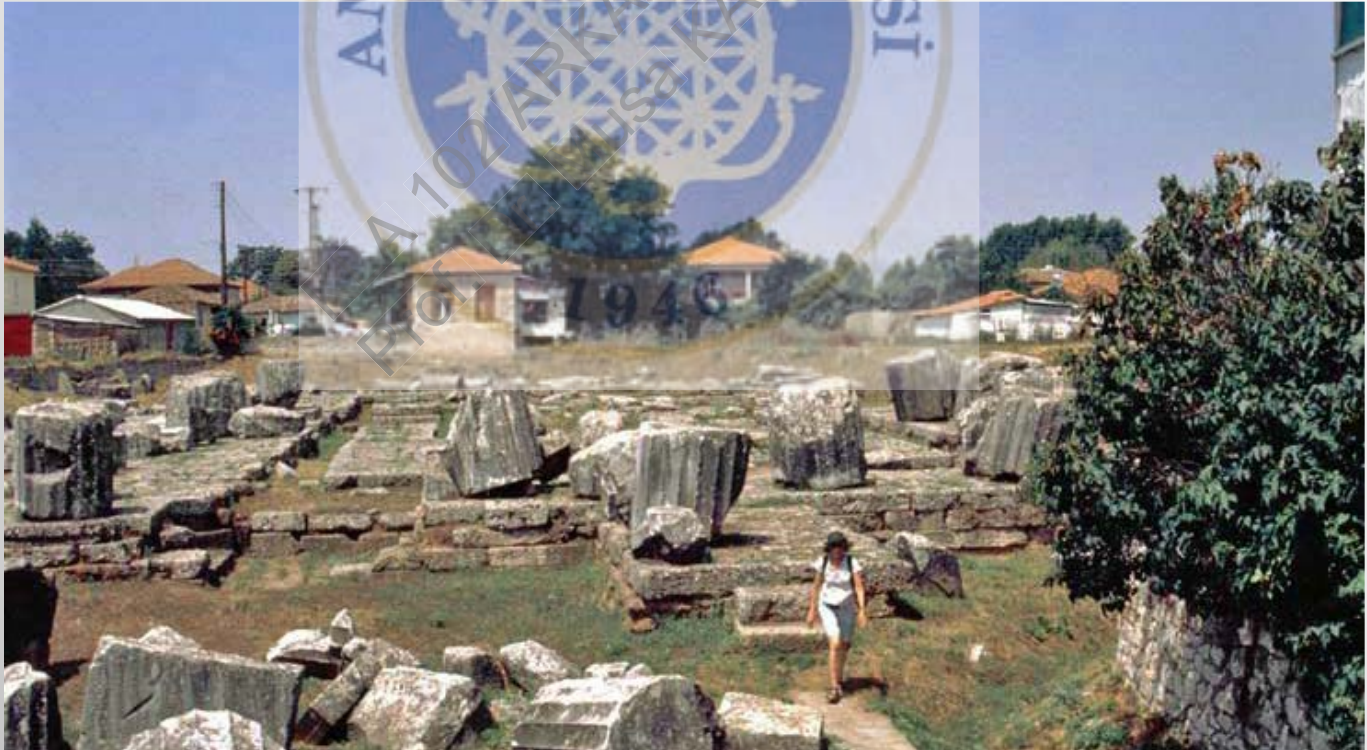

ARGIVE HERAEUM — RESTORATION IN PERSPECTIVE

By Edward L. Tilt, Architect

- Argos Hera Tapınağı, MÖ 630-600 yıllarına tarihlenen, 6x14 veya 5x14 sütun sayılı bir tapınaktır. Sadece 3 sütunu korunmuş olan tapınağın sütun yüksekliği 4,5d oranındadır.
- Geometrik dönemden itibaren buluntu veren kutsal alanda, Geometrik evreden **bir teras duvarı** ve 6. yy içine tarihlenen **2 stoa** ve **bir ziyafet evi** tespit edilmiştir.
- Buluntular ağırlıklı olarak MÖ 7.-5. yy'a tarihlenmektedir.

4- TEGEA Athena Elea Tapınağı

- MÖ 7.yy sonlarına ait olabilecek bir tapınak yapısı Tegea'da tespit edilmekle birlikte çok az sayıda mermer kalıntısı ile yapının henüz tanımlanması mümkün olmamıştır. Büyük bir peripteral yapı olduğu ve 4.yy Tegea Athena tapınağının öncüsü olabileceği düşünülmektedir.

TEGEA, ATHENA ELEA TAPINAĞI
