

PHM 3525 Drug Information

**Ankara University Faculty of Pharmacy
Department of Clinical Pharmacy**

Students' Presentations

- Question: A survey was conducted to characterize stress and peptic ulcer disease among older adults in internal medicine unit. Stress levels of the patients was measured based on a tool. According to this tool if the score from the tool is more than 5 points patients are assumed as having stress. An association was reported between the level of stress and pantoprazole use.
- If you wanted to research this relationship further, what type of study would you perform next and why?
- Presentation should not take more than 20 minutes.

Aim

- **Students are able to evaluate research designs**

Learning Objectives

- To understand the study designs and design a study
- To gain presentation skills
- To be able to work with peers in the group
