# Mermer blokların demir kenetlerle birleştirme işlemi

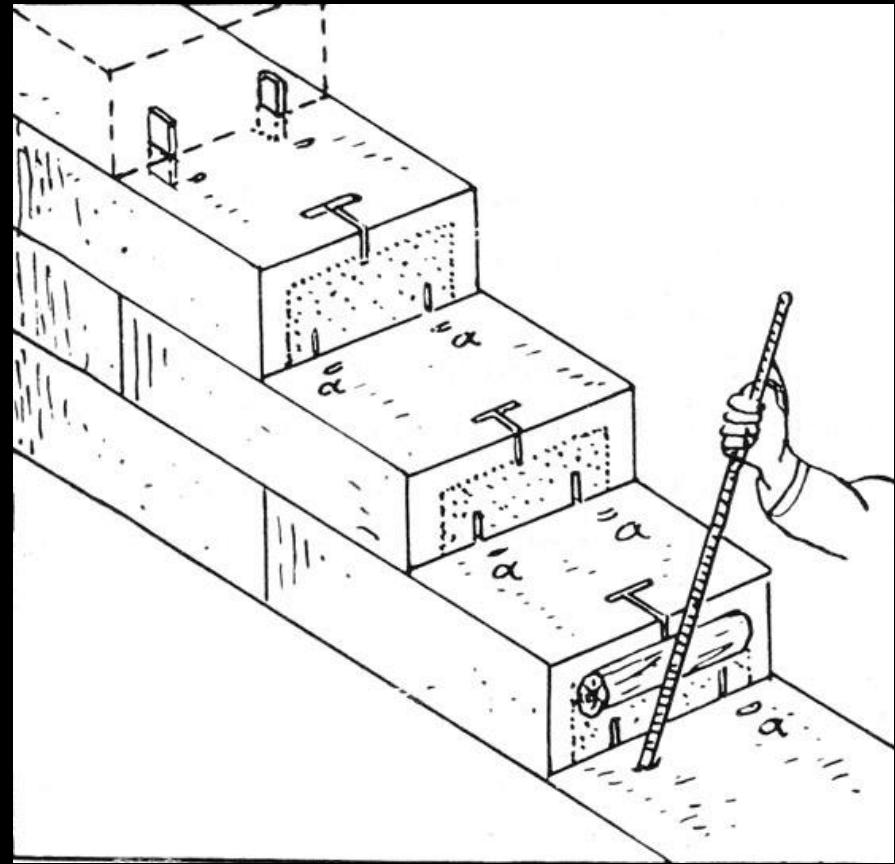

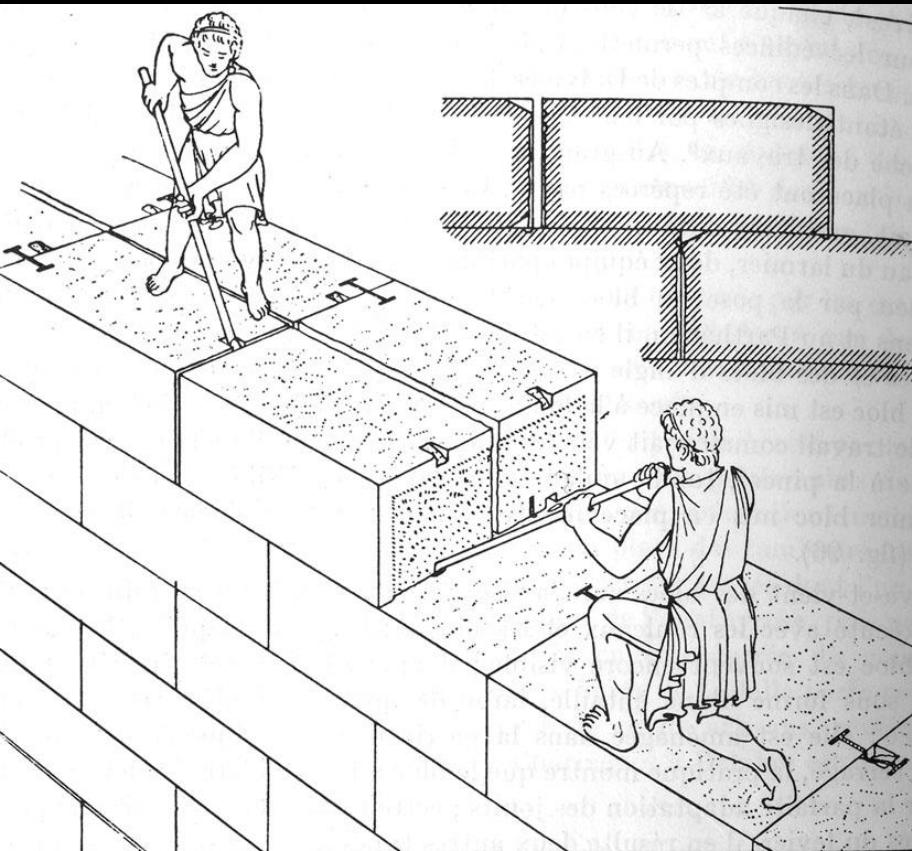

117 A number to indicate the positioning of a capital for the portico of the Temple of Venus, Pompeii.

118 Painting from the House of Siricus showing a scene on a building site. Pompeii, VIII,5,26-57.

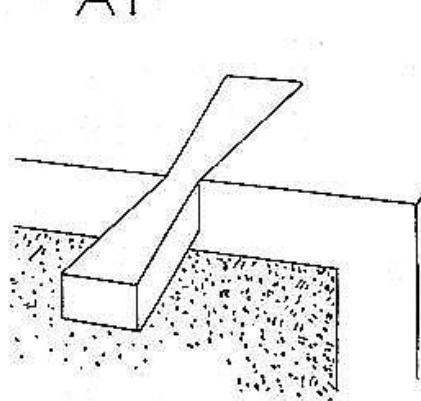

119 Wedging together blocks with a crowbar and clamping.

120 The top bed of a block from the foundations of the Roman Temple of Euromos (Caria). Note here, from left to right, the sealing clamp, three sockets for vertical dowels (with channels for the overflow) and two spike holes, thus enabling the block to be clamped to the joint of the upper block.
