Yönlendirme (Routing) Mekanizması

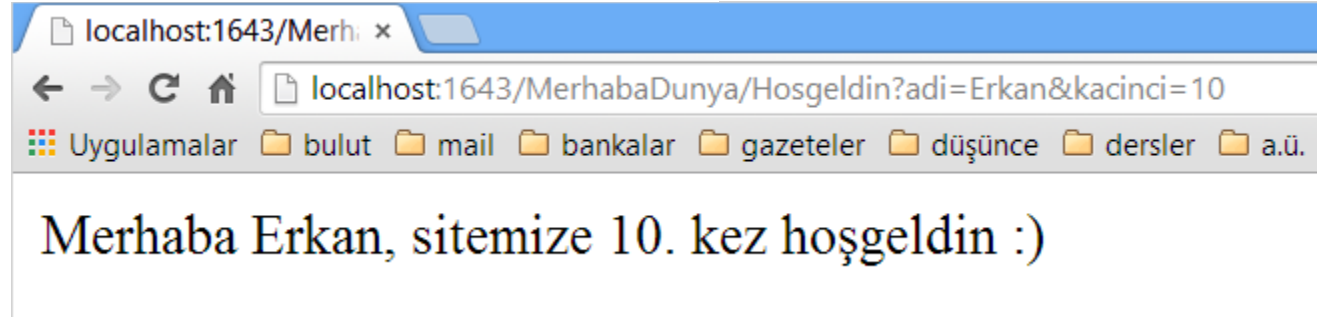

- App_Start
 - FilterConfig.cs
 - RouteConfig.cs
 - WebApiConfig.cs

```
public static void RegisterRoutes(RouteCollection routes)
{
    routes.IgnoreRoute("{resource}.axd/{*pathInfo}");

    routes.MapRoute(
        name: "Default",
        url: "{controller}/{action}/{id}",
        defaults: new { controller = "Home", action = "Index", id = UrlParameter.Optional }
    );
}
```

Yönlendirme (Routing) Mekanizması

```
//  
// GET: /MerhabaDunya/Hosgeldin/  
0 references  
public string Hosgeldin(string adi, int kacinci)  
{  
    return string.Format("Merhaba {0}, sitemize {1}. kez hoşgeldin :) ", adi, kacinci);  
}
```

Yönlendirme (Routing) Mekanizması

```
//  
// GET: /MerhabaDunya/Hosgeldin/  
0 references  
public string Hosgeldin(string adi, int kacinci)  
{  
    return string.Format("Merhaba {0}, sitemize {1}. kez hoşgeldin :) ", adi, kacinci);  
}
```

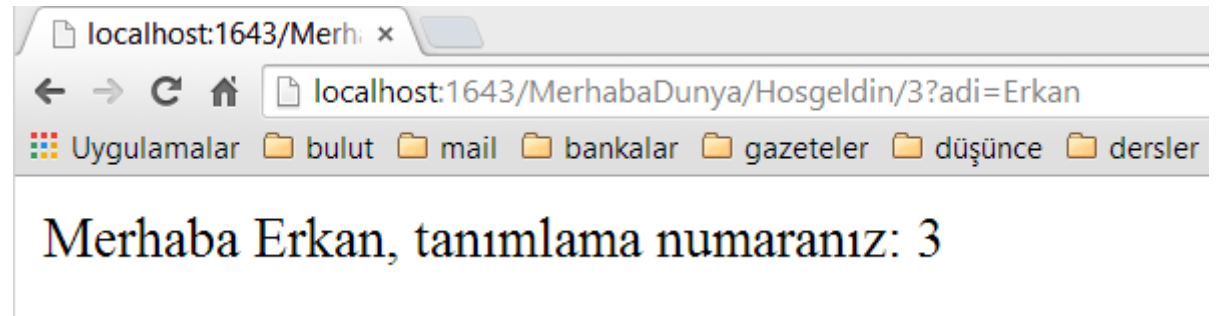

```
public string Hosgeldin(string adi, int kacinci)  
{  
    return HttpUtility.HtmlEncode("Merhaba " + adi + ", sitemize " + kacinci + ". kez hoşgeldin :) ");  
}
```

```
Request.QueryString[""];
```

Yönlendirme (Routing) Mekanizması

```
//  
// GET: /MerhabaDunya/Hosgeldin/  
0 references  
public string Hosgeldin(string adi, int ID)  
{  
    return HttpUtility.HtmlEncode("Merhaba " + adi + ", tanımlama numaranız: " + ID);  
}
```

```
public static void RegisterRoutes(RouteCollection routes)  
{  
    routes.IgnoreRoute("{resource}.axd/{*pathInfo}");  
  
    routes.MapRoute(  
        name: "Default",  
        url: "{controller}/{action}/{id}",  
        defaults: new { controller = "Home", action = "Index", id = UrlParameter.Optional }  
    );  
}
```

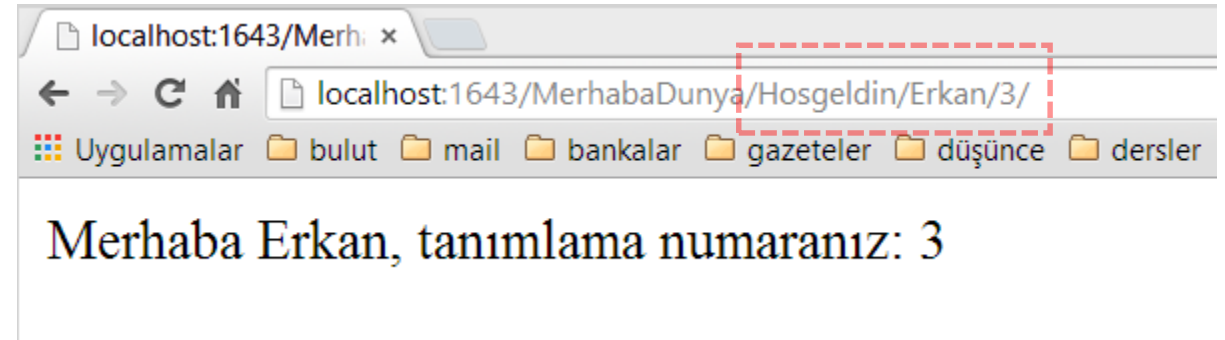

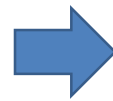

Yönlendirme (Routing) Mekanizması

```
public class RouteConfig
{
    public static void RegisterRoutes(RouteCollection routes)
    {
        routes.IgnoreRoute("{resource}.axd/{*pathInfo}");

        routes.MapRoute(
            name: "Default",
            url: "{controller}/{action}/{id}",
            defaults: new { controller = "Home", action = "Index", id = UrlParameter.Optional }
        );

        routes.MapRoute(
            name: "Merhaba",
            url: "{controller}/{action}/{adi}/{id}"
        );
    }
}
```
