

In the stability tests;

Bracket design

Matrix design

Stability test protocol

- prepared for drug / preparation
- Storage conditions
- Sampling plan
- Test periods

Stability test protocol

- Test method
- Validation of methods
- Drug and excipient technical essence / source
- Type, size and number of series taken
- Test parameters
- Acceptance criteria

Stability test protocol

- Statistical evaluation
- Results
- Repeat process of test if necessary
- Specified shelf life

Physical stability test parameters according to dosage forms

- solutions
suspensions
emulsions

- **Solid drug forms**
- **Reconstitute oral powders**
- **Hard gelatin capsule**
- **Soft gelatin capsule**
- **Tablets**
- **Coated tablets**
- **Parenteral preparations**
- **Inhalation aerosols and nasal aerosols**

- **Semi-solid drug forms**
- **Topical preparations (ointment, cream)**
- **Transdermal preparations**
- **suppositories**
