

LINE FISHING-2

PROF. DR. HASAN HÜSEYİN ATAR

FISHING WITH LURE

- IT IS A KIND OF HOOK THAT CARRIES BULLETS IN THE FORM OF FISH, WHICH MAY BE MOIST OR FODDER, ESPECIALLY USED FOR FISHING OF CARNIVOROUS FISHES. STONE OR METAL ARE POURED BY PLACING A SINGLE FISH HOOK AT THE END.

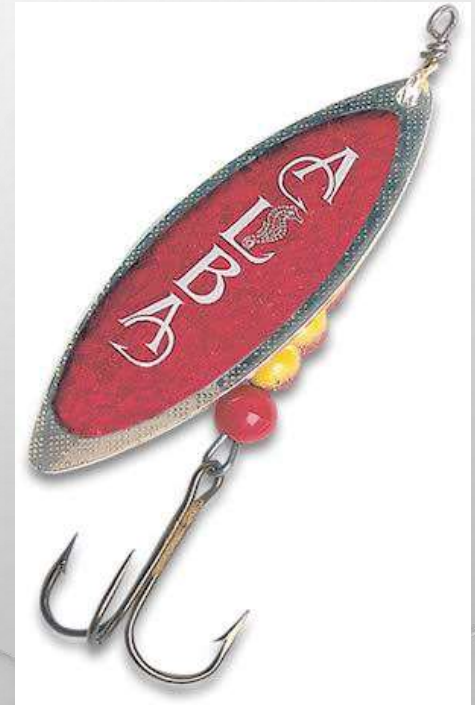

WOOLEN LINE

- DURING THE MONTHS OF SEPTEMBER AND OCTOBER, TUNA, BLUEFISH, BONITO FISH ENTER THE BOSPHORUS, AND WHEN THEY PASS THROUGH THE VINEYARDS THEY CHASE SMALL FODDER FISH SUCH AS HORSE MACKEREL, ANCHOVY AND SILVER. TOOTHY FISHES THAT ADD ALL KINDS OF LIVE BAIT TO THE FRONT DO NOT LOOK ANYMORE ATTACHED TO THE BOAT.

SPOON LINES

- THE ELONGATED ELLIPSE, CALLED A SPOON, IS ATTACHED TO THE HOOK, EITHER FLAT OR CYLINDRICAL, WITH A NICKEL-PLATED, CHROMED SHEET OR A PIECE MADE OF OTHER METALS.
