

Fishing net repair

- Preparation

The net needs to be positioned in the same way as the knots in the factory

Fishing net repair

- Knots

- Starting knot

- First make a sheet bend

- Edge bends

- Bends on solid edge

- Finishing bends

- In the opposite direction of the last mesh line, a clow hitch is made

Fishing net repair

- Cutting and repair

The required area of the net to be repaired is cut off by paying attention to the arms and knots, and the repairs on the prepared hole are made forward.
