

SYSTEMA CARDIOVASCULARE

Apex cordis: Kalbin hill part of the heart

Anastomose; Connection between two arter

Vas; Vein

Angio; Vein

Artery; Arteria

arterioles; Small artery

Vein; Vena , venae

Filebos; Vein

venule; Small diameter vein

Capillare; Capillary

SYSTEMA CARDIOVASCULARE

Cor; Heart,

Kardia; Heart

Epicardium; The outer layer of the Heart

Pericardium; Surrounding membrane of the Heart

Myocardium: Muscule layer of the heart

Endocardium: The inner layer of the heart

Atrium: Atria, two of heart chambers

Septum interatrial: division between atria

SYSTEMA CARDIOVASCULARE

Atrium dextrum : Right atrium

Atrium sinistrum : Left atrium

Ventricular dexter; Right ventricle

Valva tricuspidalis; Tricuspid valve

Valva trunci pulmonalis; Pulmonary valve

Ostium atrioventricular dextrum; Hole between right atrium and right ventricle

Ostium atrioventriculare sinistrum; The ventricle located between left atrium and left ventricle hole

Ventricle; The ventricle is the name given to the two spaces on the side of the apex of the heart

SYSTEMA CARDIOVASCULARE

Aorta; Great artery.

Ostium aorta: The hole of the left ventricular aorta

Valve aorta: Each of the valves in the ostium aorta

systole; The period during which the heart pumps blood, contraction

Diastole; The period in which the blood fills the heart, relaxation
