

Net Design

- Purse seine

- Specifications

Purse seines are the common type of surrounding nets, in which the bottom of the net is closed after encircling the fish school, by a purse line to prevent fish from escaping downwards .

- Purse seine design

- Length and depth of the net

It is determined by the type of catch and the number of ships used

Net Design

➤ Material selection

Synthetic yarns are preferred because of their high tensile strength, flexibility, low friction resistance, high specific gravity, water-repellent properties.
